JOHANSSON ENGINEERING

Supervision Round Record — Gothenburg Workshop

Document No.	JDS-LOG-MEC-009
Revision	A
Date	2026-04-10
Status	CURRENT
Author	N. Johansson
Project	JDS-PRJ-MEC-002
Client	Example Workshop AB
Site	Gothenburg Workshop
Source	JDS-LOG-MEC-007_example-program.md

1. Document Chain

```
INVENTORY  →  PROGRAM  →  [ROUND]  →  REVIEW
                          (you are      (next,
                           here)        annual)
```

Source program: JDS-LOG-MEC-007_example-program.md

2. Round Details

Round type	Monthly
Round date	2026-04-10
Start time	HH:MM
End time	HH:MM
Performed by	[Name]
Weather / conditions	[Indoor / outdoor, temperature]
Previous round date	YYYY-MM-DD
Open findings from previous	[List or None]

3. General Site Checks

#	CHECK ITEM	OK	NOT OK	N/A	NOTES
1	Access to all vessels clear and safe				
2	Lighting adequate for inspection				
3	No unusual odours or sounds in area				
4	Housekeeping around vessels acceptable				
5	Emergency equipment accessible				

4. Per-Vessel Checks

PV-001 — Main air receiver (Class A)

Operating conditions at time of check:

PARAMETER	READING	NORMAL RANGE	OK
Pressure (bar)			
Temperature (°C)			

Supervision checks:

#	CHECK ITEM	OK	NOT OK	N/A	NOTES
1	External surface: no corrosion, dents, cracks				
2	Insulation intact, no moisture indicators				
3	Support and foundation integrity				
4	Safety valve seal intact				
5	Vessel access clear and safe				

PV-002 — Workshop air receiver (Class Exempt (air/N2))

Operating conditions at time of check:

PARAMETER	READING	NORMAL RANGE	OK
Pressure (bar)			
Temperature (°C)			

Supervision checks:

#	CHECK ITEM	OK	NOT OK	N/A	NOTES
1	External surface: no corrosion, dents, cracks				

PV-003 — Steam boiler (Class A)

Operating conditions at time of check:

PARAMETER	READING	NORMAL RANGE	OK
Pressure (bar)			
Temperature (°C)			

Supervision checks:

#	CHECK ITEM	OK	NOT OK	N/A	NOTES
1	External surface: no corrosion, dents, cracks				
2	Insulation intact, no moisture indicators				
3	Support and foundation integrity				
4	Safety valve seal intact				
5	Vessel access clear and safe				

PV-004 — Refrigeration receiver (Class A)

Operating conditions at time of check:

PARAMETER	READING	NORMAL RANGE	OK
Pressure (bar)			
Temperature (°C)			

Supervision checks:

#	CHECK ITEM	OK	NOT OK	N/A	NOTES
1	External surface: no corrosion, dents, cracks				
2	Insulation intact, no moisture indicators				
3	Support and foundation integrity				
4	Safety valve seal intact				
5	Vessel access clear and safe				

PV-005 — Hydraulic accumulator (Class B)

Operating conditions at time of check:

PARAMETER	READING	NORMAL RANGE	OK
Pressure (bar)			
Temperature (°C)			

Supervision checks:

#	CHECK ITEM	OK	NOT OK	N/A	NOTES
1	External surface: no corrosion, dents, cracks				
2	Insulation intact, no moisture indicators				
3	Support and foundation integrity				
4	Safety valve seal intact				
5	Vessel access clear and safe				

PV-006 — Expansion vessel (Class Below threshold)

Operating conditions at time of check:

PARAMETER	READING	NORMAL RANGE	OK
Pressure (bar)			
Temperature (°C)			

Supervision checks:

#	CHECK ITEM	OK	NOT OK	N/A	NOTES
1	External surface: no corrosion, dents, cracks				

PV-007 — Sandblast receiver (Class Exempt (air/N2))

Operating conditions at time of check:

PARAMETER	READING	NORMAL RANGE	OK
Pressure (bar)			
Temperature (°C)			

Supervision checks:

#	CHECK ITEM	OK	NOT OK	N/A	NOTES
1	External surface: no corrosion, dents, cracks				

5. Safety Device Checks

DEVICE ID	TYPE	PROTECTS	CHECK	RESULT	NOTES
SV-001	Safety valve	PV-001	Seal check	OK / Not OK	
SV-002	Safety valve	PV-002	Seal check	OK / Not OK	
SV-003	Safety valve	PV-003	Seal check	OK / Not OK	
SV-004	Safety valve	PV-004	Seal check	OK / Not OK	
SV-005	Safety valve	PV-005	Seal check	OK / Not OK	
SV-006	Safety valve	PV-006	Seal check	OK / Not OK	
SV-007	Safety valve	PV-007	Seal check	OK / Not OK	

6. Findings Summary

#	VESSEL	FINDING	SEVERITY	PHOTO	ACTION
1			Crit / Maj / Min / Obs	Y / N	
2			Crit / Maj / Min / Obs	Y / N	
3			Crit / Maj / Min / Obs	Y / N	

Corrective Actions Raised

#	FINDING	CA REF.	ASSIGNED TO	DUE DATE
1		JDS-PRO-008		

7. Previous Findings Follow-Up

FINDING REF	ORIGINAL DATE	DESCRIPTION	STATUS
			Open / Closed

8. Round Summary

Total vessels inspected	7
Checks performed	[N]
Findings this round	[N]
Previous findings closed	[N]
Previous findings still open	[N]
Overall site condition	Good / Acceptable / Needs attention

9. Sign-Off

Inspected by	[Name, signature]
Date	2026-04-10
Next scheduled round	YYYY-MM-DD
Reviewed by	[Name, signature, date]

10. Next Step

```
INVENTORY  →  PROGRAM  →  [ROUND]  →  REVIEW
                          (done)       (annual)
```

After completing this round: 1. File this record in the client's `rounds/` folder 2. Update the program register (JDS-LOG-MEC-005) 3. Raise corrective actions for any findings (JDS-PRO-008) 4. Generate the next round when scheduled:

```
python3 scripts/jds-classify.py --round --from JDS-LOG-MEC-007_example-program.md --output round-YY
```
