This inventory is **Step 1** of the Vessel Supervision System.

```
[INVENTORY]  →  PROGRAM  →  ROUND  →  REVIEW
 (you are       (next)
  here)
```

To generate the supervision program from this inventory, run:

```
python3 scripts/jds-classify.py --program --from [this-file.md] --output [program.md]
```

The script will read this inventory and create a supervision program pre-filled with all vessels, risk-based check schedules, and inspection intervals.
