JOHANSSON ENGINEERING

02 — What Equipment Do You Have

Walk your site and list every pressurised vessel. For each one, write down the nameplate data. Then classify it to determine what inspections are required.

How to Fill This In

1. Go to each vessel and read the nameplate
2. Write the data in the tables below (one row per vessel)
3. Calculate PS x V (pressure times volume) for each vessel
4. Use the classification guide to determine the risk class
5. Write down when it was last inspected and when the next one is due

Vessel Register

> Write one row per vessel. Use the nameplate on the vessel for manufacturer data.

NR	VESSEL ID	DESCRIPTION	LOCATION
1			
2			
3			
4			
5			
6			
7			
8			
9			
10			

Technical Data

> Read PS (design pressure) and volume from the nameplate. Multiply PS x V yourself.

NR	PS (BAR)	TEMP. MAX (C)	VOLUME (L)	PS X V	MEDIUM
1					
2					
3					
4					
5					
6					
7					
8					
9					
10					

Classification

> Use PS x V from the table above and the guide below to determine the risk class.

Classification guide:

IF THE MEDIUM IS...	AND PS X V IS...	THEN THE CLASS IS...
Non-dangerous (air, nitrogen, water, steam)	Over 10,000	**Class A**
Non-dangerous	1,001 — 10,000	**Class B**
Non-dangerous	51 — 1,000	Below B
Dangerous (LPG, ammonia, hydrogen, chlorine)	Over 3,000	**Class A**
Dangerous	201 — 3,000	**Class B**
Any medium	50 or less	Not classified

> **Air and nitrogen exception:** Vessels for air or nitrogen that would be Class B are exempt from periodic inspection.

NR	VESSEL ID	CLASS	INSPECTOR NEEDED	CE MARKED	NEXT INSPECTION DUE
1		A / B / -	Accredited / Own / -	Y / N	
2		A / B / -	Accredited / Own / -	Y / N	
3		A / B / -	Accredited / Own / -	Y / N	
4		A / B / -	Accredited / Own / -	Y / N	
5		A / B / -	Accredited / Own / -	Y / N	
6		A / B / -	Accredited / Own / -	Y / N	
7		A / B / -	Accredited / Own / -	Y / N	
8		A / B / -	Accredited / Own / -	Y / N	
9		A / B / -	Accredited / Own / -	Y / N	
10		A / B / -	Accredited / Own / -	Y / N	

Summary: Class A: ____ | Class B: ____ | Below/Exempt: ____ | **Total:** ____

Safety Devices

> List every safety valve, bursting disc, or pressure switch. You can find them mounted on or near each vessel.

DEVICE	TYPE	PROTECTS VESSEL	SET PRESSURE (BAR)	LAST TEST	NEXT TEST
	SV / BD / PS				
	SV / BD / PS				
	SV / BD / PS				
	SV / BD / PS				

Placement Check

For each vessel, check that it is safely placed. Mark OK or X.

CHECK	1	2	3	4	5
Can be maintained and inspected					
Protected from nearby activities					
Personnel can shut off if needed					
Personnel can evacuate if needed					
Temperature within design range					

Numbers correspond to vessel Nr above.
